9:00 – 10:30 am	Pre-Conference Workshop: Tackling Adoption Barriers Beyond Technology While the potential benefits of retail automation such as seed and crop protection e-fulfillment are clear, adoption among medium and large retail operations still often falters. Rather than the technology itself, a lack of value understanding by key leadership, poor buy-in from the top, and misalignment of B2B opportunities with current processes often scuttle adoption. In this special workshop, Land O'Lakes managers share their experiences on the front lines, and provide advice and insight on how to move the needle on B2B technical implementation. Workshop participants will have the opportunity to share their own challenges and successes and gain insight from peers on how they are working through these issues.
