PCR 256 – Request Update Verification Tools

On Saturday, 27 April, AGIIS was enhanced so that the Google Maps and Google Search buttons will be present on the Request Update page, allowing the Directory Administrators to verify name and address information with the click of a button.

This enhancement will be transparent to users but visible to Directory Administrators.

These tools - Google Maps Search and Google Internet Search on the Directory Request page - will increase efficiency for the Directory Administrators. The enhancement will eliminate the need for Directory Administrators to copy and paste data into a different browser tab to confirm an address, and as a result, users will get faster responses to their add/update requests.
